1, NEW ENGLAND

VOLUME II IS THE FIRST OF A THREE-VOLUME STATISTICAL
SUPPLEMENT WHICH SUPPLIES RAW DATA TO ACCOMPANY A NARRATIVE
EVALUATION REPORT (VOLUME I) OF 1966 TITLE I ELEMENTARY AND
SECONDARY EDUCATION ACT PROJECTS IN NEW ENGLAND. THE
SUPPLEMENT PRESENTS DATA ON THREE VARIABLES--THE NEW ENGLAND
STATES, THE COMMUNITY TYPES INVOLVED IN TITLE I PROJECTS
(STANDARD METROPOLITAN STATISTICAL AREAS OR SMSA), AND THE
TYPE OF PROJECT. THIS PARTICULAR VOLUME CONTAINS (1) BASIC
DATA ON THE LOCAL EDUCATION AGENCIES AND (2) DATA WHICH
COMPARE THE STATES AND COMMUNITY TYPES. DISCUSSION OF THE
DATA IN ALL THREE VOLUMES OF THE SUPPLEMENT IS CONFINED TO
VOLUME I OF THE REPORT. (LB)

How to Read the Tables: An Example

INTRODUCTION

The Statistical Supplement (Volumes II, III, and IV) is intended as a companion to Volume I of *The Impact of Title I: An Assessment Program for New England*. It includes four parts that provide the detailed statistical data upon which the assessment is based, as well as other supplementary information. There is no attempt to discuss or analyze the data; for that, the reader should refer to the main body of the report.

The three major variables in the NEFDS analysis are the New England states, the community types involved in Title I projects, and the types of projects conducted. These will be explained in detail later, but it is important to know that these variables form the basis for the organization of the Statistical Supplement.

Part 1 includes basic data about the local education agencies (LEAs) eligible for FY66 Title I funds. Much of the data was derived from the application forms filed by every LEA that wanted to apply for Title I funds and includes information about enrollment and expenditures in the LEA. There is a comparison of the number of LEAs eligible for Title I funds and the number actually participating. Part 1 also contains some information about the LEAs who were eligible for Title I funds but, for one reason or another, did not participate in the program. The data about these LEAs were supplied by the six state departments of education, and include enrollments, per pupil expenditures, and the amount of money that was allocated to these

LEAs. Most of the data in Part 1 is broken down in detail by state and by community type.

The other three parts include data about the projects proposed and conducted under Title I. Each part focuses on two of the three major variables and contains basically the same data broken down in different ways. Part 2 compares the states and the community types; Part 3 compares the community types and the major project types; Part 4 compares the states and the major project types. Each of these three parts contains four sections of data.

First, the post-project reports. This information was derived from the final reports that the states asked each LEA to submit. Although each state's report form varied somewhat, it provided information about the number and distribution of participants, the duration of the projects and staff participation, as well as information on the types of evaluation methods used and the problems that were most frequently encountered.

Second, the fiscal reports of the LEAs. This section includes a comparison of the amount allocated by Congress, the amount approved by the states, and the amount actually spent by the LEAs. The amount spent is broken down in detail by the type of expenditures, the length of the projects, and the time of the projects (summer, school year, etc.).

Third, details of the projects that were proposed. This information was provided on the Title I application forms and is much more detailed than the post-project reports. It is from the application data that one sees most clearly how the LEAs perceived their problems

and the areas where they considered it most beneficial, or most feasible, to concentrate their efforts. The data include in detail the number of projects proposed, the students expected to be included, the adults scheduled to participate, the length of the projects, and the number of cooperative projects.

A detailed table of contents is included at the beginning of each part. There are also several graphs included that present a brief summary of some of the data included in the tables.

CLASSIFICATION AND CODING SYSTEMS

The three major variables mentioned previously in the NEEDS analysis are the states, the community types involved in Title I projects and the types of projects conducted. For all of these variables, detailed coding systems were devised and all projects and communities were placed in appropriate categories. Because these variables are used frequently in the appendices, some explanation of the meaning of the coding systems is included.

1. The New England States

The six New England states will always appear in alphabetical order.

<u>Code No.</u>	<u>State</u>
1	Connecticut
2	Maine
3	Massachusetts
4	New Hampshire
5	Rhode Island
6	Vermont

2. Community Types

To examine local education agencies and projects in terms of characteristics of the communities they served, a classification system was devised to provide a more meaningful index of geographic, population, and employment characteristics than simply an urban-rural differentiation. The five community type groups used in the NEEDS project are derived from two documents: the statistical groupings outlined in the Bureau of the Budget publication, *Standard Metropolitan Statistical Areas, 1964*,

prepared by the United States Office of Education, Division of Elementary and Secondary Education and found in the Appendix to the FY66 state Title I evaluation report forms.

The definition of Standard Metropolitan Statistical Areas, established on the basis of the 1960 census by the Bureau of the Budget, offers a uniform guide to standard metropolitan boundaries for federal agencies publishing statistical data. The classification differentiates those areas, cities, towns and counties which are considered metropolitan in character from those which are not. The criteria used to make differentiations among communities include population, population density, and employment patterns. The Bureau of the Budget handbook stipulates 219 metropolitan statistical areas in the United States and for each area lists the core city or cities and the counties (and in the case of New England, the specific cities and towns) considered to be within a given metropolitan area.

The United States Office of Education has developed a classification system, based upon the Standard Metropolitan Statistical Areas, which is designed for local education agencies rather than municipal units. This system outlines five LEA groupings, three within metropolitan areas and two in non-metropolitan areas.

For the purposes of the NEEDS study, the USOE system was reinterpreted to permit assignment of community types both to LEAs and to projects themselves on the same basis. This flexibility was necessary since we were interested in examining the data both from the point of view of the LEAs eligible for Title I funds and from the point of view

of the total population area served by individual projects. In the case of cooperative projects operated by two or more LEAs, the combined area of all LEAs involved became the criterion for the community-type of the project. As a result, according to this study's classification system, a project could well be serving a large enough base population to assign it to a different community type than that of any of its component LEAs. Cooperative projects were most prevalent among rural LEAs. In metropolitan areas this situation was less frequent; projects were usually designed to serve only one LEA and therefore assumed the community type of that LEA.

For ease in discussion, the five community types are referred to as "SMSAs" throughout the report. Strictly speaking, however, the Bureau of the Budget system uses the "SMSA" abbreviation to refer only to a metropolitan area. The following five community types are those used in this study.

COMMUNITY TYPE CLASSIFICATIONS

SMSA Type 1:

The largest "core city" LEA in a metropolitan area from which the Standard Metropolitan Statistical Area draws its name. In the case of twin or tri-city areas, such as the "Springfield-Chicopee-Holyoke, Massachusetts-Connecticut" area, all cities included in the metropolitan area name were assigned to SMSA Type 1.

SMSA Type 2:

All other units (cities, towns, unincorporated areas, and LEAs) within the metropolitan area with populations of 50,000 or more.

SMSA Type 3:

All other units within the metropolitan area with populations of fewer than 50,000.

SMSA Type 4:

All units outside a metropolitan area with populations between 2,500 and 49,999.

SMSA Type 5:

All units outside a metropolitan area with populations under 2,500.

3. Project Types

All Title I projects in New England were classified into one of sixty-seven specific project type groups according to what appeared from the data to be the major activity or subject matter focus of the projects. These sixty-seven specific areas of project activity are sub-types of fourteen (14) broader more manageable categories which are the basis for most of the analyses. Unless otherwise stated, the references to "project type" in this report refer to these fourteen major groupings.

The following list indicates the fourteen major project types and the distribution of the specific project types.

<u>Code No.</u>	<u>MAJOR CATEGORIES OF PROJECT TYPES</u>
-----------------	--

1. <u>ACADEMIC INSTRUCTION:</u>	
---------------------------------	--

	Foreign Languages
	Mathematics
	Science
	Social Studies
	Curriculum Development

This group includes all those projects whose remedial thrust was clearly in one academic area or in curriculum development activity. Reading and language arts have been made into two independent categories rather than included in "Academic Instruction." The large numbers of projects specifically in these areas indicated their importance to the LEAs and it therefore seemed valuable to separate these projects from other academically focused projects.

2. READING:

Remedial Reading
Developmental
Reading Readiness

3. LANGUAGE ARTS:

English Language Arts
English as a Second Language
Language Arts - Remedial Reading
Speech Therapy

4. INSTRUCTIONAL SERVICES:

Reduction of Class Size
Additional Staff
Small Group Instruction
Teacher Aides
Other Sub-professional Help
Tutoring
Individualized Instruction

This category was necessary for classifying those projects which did not specify a particular subject or activity area but rather emphasized staff and student grouping patterns. Projects were assigned to subdivisions within this category only when no more specific area of activity was evident. Generally, in projects stipulating their remedial focus more clearly, the activities in this category were considered implementing activities rather than project types.

5. GENERAL REMEDIAL:

Summer School
General Remedial
Drop-outs
Absenteeism

A "General Remedial" category was created because of insufficient data and because of the varying degrees of specificity in the LEA descriptions of their projects. A number of projects lacked one particular focus but reported the project aim as "remedial instruction," "remediation," or "compensatory education" and proceeded to offer a number of diverse activities toward these ends. Since ESEA Title I legislation was designed to provide for compensatory educational programs, compensatory education is assumed to be a concern of all projects but is relatively useless as the operational objective of a particular project.

6. VOCATIONAL:

Business and Office
Home Economics
Industrial Arts
Work-Study

7. SPECIAL CLASSES:

Special Education
Mentally Retarded
Emotionally Disturbed
Hard of Hearing
Physically Handicapped
Slow Learners
Special Classes
Gifted
Adult Education

8. SCHOOL READINESS:

Pre-School
Pre-Kindergarten
Kindergarten
School Readiness Programs

9. MATERIALS AND EQUIPMENT:

Curriculum Materials
Equipment
Audio-Visual
Additional Classroom Space

10. GUIDANCE AND PSYCHOLOGICAL SERVICES:

Testing and Research
Diagnosis
Psychiatric
Psychological
Social Work
Home-School Visiting
Guidance and Counseling
Counseling, Psych., Social

11. NON-ACADEMIC SERVICES TO PUPILS:

Physical Education
Food Services
Clothing
Waiver or Provisions of Fees for Books, etc.
Health Services
Dental
Eye
Hearing
Transportation

12. LIBRARY:

Library Activities

13. NON-ACADEMIC ENRICHMENT ACTIVITIES:

Art
Cultural Enrichment
Music
Recreation

14. IN-SERVICE TRAINING:

In-service Training

GRADE SPANS FOR EVALUATION REPORTS

To give a more detailed indication of the grades involved in Title I projects the grade spans reported have been grouped into six groups. While many projects reported enrollment by individual grade, some projects reported their enrollments only in grade spans - some as large as K - 12. Any project reporting five or less grades together was included in the span which covered the most grades being reported. An enrollment which was equally split between two spans (3-4 or 8-11) was assigned to the lower span.

- Span 1: Primarily Pre-Kindergarten and Kindergarten
- Span 2: Primarily Grades 1-3
- Span 3: Primarily Grades 4-6
- Span 4: Primarily Grades 7-9
- Span 5: Primarily Grades 10-12
- Span 6: Any project reporting six or more grades in a span

FIG. 2-A6 METHODS OF EVALUATION

METHODS OF EVALUATION

- 1 = Project group and non-project (control) group
- 2 = Pre- and post-test comparison on project group only
- 3 = Pre- and/or post-test compared to local, state, or national groups
- 4 = Test data from project group compared with test data from previous years in project school
- 5 = Project group tested but no comparison data
- 6 = Other

MOST FREQUENT METHODS USED

No evaluation method reported:			202 projects
Method	6	only	192
	2	only	189
	5	only	116
	3	only	71
	2&3		50
	4	only	39
	5&6		37
	2&6		32
	2&5		29

FIG. 2-A7 TYPES OF MEASURES USED (Evaluation Data)

N = 1,306

TYPES OF MEASURES

1. Measures other than tests - teacher ratings, anecdotal ratings, observer reports, etc.
2. Other measures and standardized tests (achievement, intelligence, aptitude, interest, attitude).
3. Standardized tests only
4. Locally constructed tests only
5. Standard and local tests primarily

FIG. 2-A8 TYPES OF PROBLEMS (Evaluation Data)

TYPES OF PROBLEMS

1. Services: library, health, guidance
2. Facilities: library, classroom space, materials, transportation
3. Personnel: administrative, teachers, teacher aides, clerical
4. Financial: Title I funds, local funds
5. Time: for planning, training, executing
6. Cooperation: local, parent, private school, other federal programs
7. Students: identification, enrollment, attendance
8. Operation: scheduling, coordination, training, communication, evaluation, paperwork
